Experience

HonestPolicy

Director of Engineering May 2022 – July 2023

Helping deliver software solutions using Ruby/Ruby on Rails, Redis, and PostgreSQL. Involved in system architecture with techs like AWS, Docker, and Lambda Functions. Passionate about delivering scalable and maintainable products, and always seeking new and innovative ways to improve the engineering process. Working with CI/CD and scaling different micro-services.

KingTide

FullStack DevOps Engineer April 2020 – May 2022

Scale a Ruby on Rails legacy code and adapt it with a new architecture using a Rails API code and React as a FrontEnd Framework. It used PostgreSQL as a database. Working in hand with clients for scaling applications and API's on AWS. Creating multiple scripts in Bash for deployments on Ubuntu Services. Monitoring and logging app performances with: New Relic, DataDog and LogRocket.

Kafasa

Sr. Ruby on Rails | DevOps Consultant December 2019 – February 2022

Create and develop a whole platform from scratch with Ruby on Rails using PostgreSQL. I was in charge of designing the whole software architecture, including deployment, Database, Testing, and design patterns. Also, creating strategies for low costs scaling with AWS and internal ubuntu servers. And continuous deployments for constant updating app features.

Baxten

FullStack Developer | System Designer February 2019 – April 2019

A temporary project that was in need to be built urgently. I added this to my profile because it was a project that involved fast development in two months. Currently, this project has been deployed to production. (www.ado.com.mx) – Also working on a peer to peer system for system communication of data between machines using SOAP.

Ergo Mobiliario

FullStack Developer | Shopify Developer October 2018 – April 2019

Be in charge of the e-commerce strategy, and sales for physical stores. Create the Iseating project 100% created in Rails. I used technologies like liquid, Shopify API, Ruby on Rails, and Javascript for a complete platform between users and employees. (www.iseating.com.mx)

Hewlett Packard Enterprise

Software Consultant November 2015 – May 2017

Give high-quality support to customers in production factories which are 24/7. I handled responsibilities like SAP (Bases, Hanna), IBM mainframe, Oracle console issues, Remote Desktop support, Issue follow-up, etc
